### Reason for revisions

The business environment in this fiscal year is still surrounded by tough circumstances, but the overall global economy seems to have passed the worst period, triggered by economic stimulus packages of individual countries. In the electronics market, some of the markets such as flat-screen TVs are advancing in the direction of recovery.

ROHM has been implementing various cost reduction measures to cope with the drastic deterioration in the market environment since last autumn, and these measures are showing a certain level of effects. Under these circumstances, the business condition is progressing stronger than the forecast in the beginning of this fiscal year. Accordingly, ROHM has revised the business results forecast for the first six months of the year ending March 31, 2010 as above.

As for the business results forecast throughout the year ending March 31, 2010, the outlook of the business environment of the second half is still unclear. Therefore, ROHM decided to leave the business results forecast announced in the "Financial Report for the Year Ended March 31, 2009" on May 11, 2009, unchanged.

### <Notabilia on forecast data>

Since the statement regarding the business results forecast accounted for in this press release is based on current information acquired by ROHM as well as specific legitimate prerequisites, actual business results may be considerably different due to various factors.
