<Reasons for revisions>

1. The booking of non-operating income (foreign currency exchange gain)

Due to the drastic fluctuation of the exchange rate, the Company expects to post a foreign currency exchange gain of 5,300 million yen as a non-operating income during the fourth quarter of the year ending March 31, 2013 (January 1, 2013 to March 31, 2013).

2. The booking of impairment loss

As a result of the evaluation of realizability of the fixed assets of the Company and its consolidated subsidiaries, pursuant to the Accounting Standard for Impairment of Fixed Assets, ROHM plans to post 53,300 million yen of impairment loss reducing the book value of the fixed assets to the recoverable amount in the consolidated financial statements for the fiscal year ended March 31, 2013.

3. Revisions to forecast data

While the business environment in the year ended March 31, 2013 was in severe conditions as the demand for digital home appliances including flat-screen TVs was sluggish, sales have slightly exceeded the forecast due to depreciation of yen. However, the cost of sales has increased due to the strict evaluation of the inventories with an aim to respond to rapid changes of the business environment. In addition, in consideration of foreign currency exchange gain as well as booking of impairment loss, the Company has revised the forecast data of the business results of the year ended March 31, 2013 as the above.
