

Portable Charger for Electric Vehicles

ZapCharger

APEC

ZapCharger Portable is the worlds first portable charging cable with an electronic transformer built in, making it incredibly flexible and safe. The charging cable has been formed as a regular charging cable, but is fully galvanically insulated and compatible with any electric grid.

Protection

- Overvoltage Class 3 (4kV)
- Redundant RCD
- Isolation monitor
- Ground current limiter

Applications

- 230V – up to 3.6KW
- 50/60Hz 16A, 1-phase
