

Ideal for ADAS Notification Sounds • Easily Play Back Messages and Sound Effects

Automotive-Grade Speech ICs

ML22Q535, ML22Q533, ML22Q532, ML22530

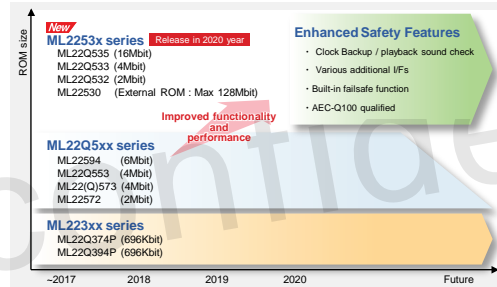

Features

- Memory capacity can be selected according to playback time
- Ideal for playback of various warning sounds and alert messages
- Built-in safety functions
Clock backup / Playback sound check
- Other Functions
 - Voice data can be rewritten via the host MCU
 - HQ-ADPCM playback method added
 - 4ch simultaneous playback

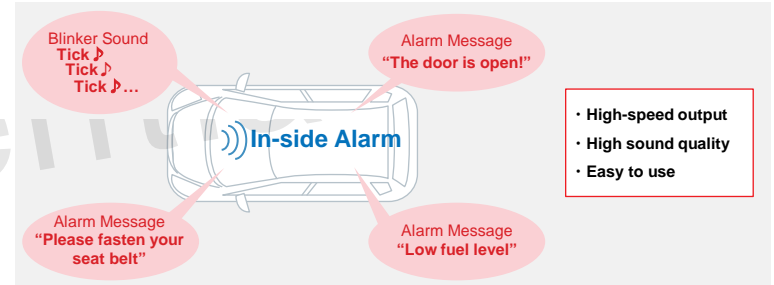

Applications

- Vehicle notification/warning sound playback
 - Collision avoidance systems
 - Instrument clusters
 - Drive recorders
